

Academy Mapping Errata

Corrections to Weeks 1–2 Companion v2 · Verified against live Skilljar UI

WHAT THIS DOCUMENT FIXES

Companion v2 referenced Anthropic Academy lessons by Coursera-mirror names. The live Skilljar course uses different module and lesson titles, and a few v2 lesson names don't exist in Skilljar at all. This errata supplies the correct references for all 14 days. **Use this document alongside v2's gold "Watch on Anthropic Academy" blocks.**

SCOPE	All 14 days of Weeks 1–2
SOURCE	Live Skilljar UI screenshots
COURSE	Building with the Claude API (anthropic.skilljar.com)
PREPARED	June 2026

01

Course Structure (verified)

Building with the Claude API on Skilljar has 13 top-level modules. Three of them are referenced across Weeks 1–2 — the rest are saved for later weeks of the plan.

FULL MODULE LIST

01	Introduction	—
02	Anthropic overview	—
03	Accessing Claude with the API	W1 D1–D5, D7
04	Prompt evaluation	W2 D2, D7
05	Prompt engineering techniques	W2 D1, D7
06	Tool use with Claude	Week 3
07	RAG and Agentic Search	Project 3
08	Features of Claude	W1 D3, W2 D6
09	Model Context Protocol	Week 4
10	Anthropic apps — Claude Code and computer use	Week 13
11	Agents and workflows	Weeks 7–9
12	Final assessment	Optional
13	Wrapping up!	—

HOW TO USE THIS ERRATA

For each day in v2, look up the same day below. The "Skilljar module" column gives you the exact module name to expand in the Skilljar sidebar. The lesson list under it gives you the specific lessons to mark complete. Use the circle checkmarks in Skilljar as your authoritative progress tracker — that's how you'll know you actually finished the relevant content, not by re-checking this PDF.

02

Per-Day Lesson Mapping

Below: corrected Skilljar lessons for each of the 14 days. Where v2 had no matching lesson or guessed wrong, the row says so explicitly and proposes a substitute resource.

D01

W1 • Mon

Setup & First API Call

SKILLJAR MODULE

Accessing Claude with the API

- Accessing the API ~5m
- Getting an API key ~5m
- Making a request ~6m

Watch all three before or after the day's lab.

D02

W1 • Tue

Multi-Turn Chat

SKILLJAR MODULE

Accessing Claude with the API

- Multi-Turn conversations ~9m
- Chat exercise ~4m
- System prompts ~6m
- System prompts exercise ~1m

Direct match for today's chat-loop lab. Watch first if you prefer to see implementation.

D03

W1 • Wed

Content Blocks & Vision

SKILLJAR MODULE

Features of Claude

- Image support ~10m
- PDF support ~1m

Skip the rest of *Features of Claude* for now — Extended thinking, Citations, and Caching come later in this companion. **Tool use with Claude** module is Week 3.

D04

W1 • Thu

Streaming

SKILLJAR MODULE

Accessing Claude with the API

- Response streaming ~8m

One lesson, direct match for today's lab.

D05

W1 • Fri

Temperature & Parameters

SKILLJAR MODULE

Accessing Claude with the API

- **Temperature** ~6m
- **Structured data** ~6m
- **Structured data exercise** ~5m

Structured data previews Wednesday W2's deep dive. Watching now pre-loads the JSON pattern.

D06

W1 • Sat

Token Counting & Cost

SKILLJAR MODULE

(no matching lesson)

No direct lesson — see notes.

The course has no dedicated cost-estimation lesson — use the 30 minutes for [pricing docs](#) (verify your `cost_estimator.py` prices) and [token-counting docs](#).

D07

W1 • Sun

Consolidation & Review

SKILLJAR MODULE

Accessing Claude with the API

- **Quiz on accessing Claude with the API** ~15m

Official Week 1 self-test. Aim 80%+. Skilljar lets you retake if needed. The *Course satisfaction survey* is a feedback form — skip or submit, no impact on prep.

D08

W2 • Mon

Prompt Engineering Basics

SKILLJAR MODULE

Prompt engineering techniques

- **Being clear and direct** ~2m
- **Being specific** ~5m
- **Structure with XML tags** ~4m
- **Providing examples** ~7m

Lesson titles approximate — module structure was verified but individual lesson names in this module weren't captured in screenshots. Expand the module in your sidebar and match by topic if titles differ.

D09	W2 • Tue Few-Shot & Evals	SKILLJAR MODULE Prompt evaluation
	◦ A typical eval workflow ~5m ◦ Generating test datasets ~5m ◦ Running the eval ~7m ◦ Code based grading ~7m ◦ Try out a prompt eval ~5m <i>Code based grading</i> describes exactly what your <code>eval.py</code> does. <i>Model based grading</i> (also in this module, optional today) is the LLM-as-judge pattern you'll see again in Project 1.	
D10	W2 • Wed Structured Output / JSON	SKILLJAR MODULE (no direct lesson)
	<i>No direct lesson — see notes.</i> v2 told you to watch 'Tools for structured data' — that lesson does not exist in the Skilljar course. The course teaches structured output via (1) Friday W1's <i>Structured data</i> lesson and (2) the <i>Tool use with Claude</i> module (Week 3 material). Today's prefill technique is a practical Anthropic pattern not covered by a dedicated video. Re-watch <i>Structured data exercise</i> if you want a refresher, then trust the lab.	
D11	W2 • Thu Pydantic	SKILLJAR MODULE (not in course)
	<i>No direct lesson — see notes.</i> Skilljar doesn't teach Pydantic. Read Pydantic v2 • Models (~15m) and Pydantic v2 • Fields (~15m). Focus on <code>BaseModel</code>, <code>Field</code>, type annotations, and <code>ValidationError</code>.	
D12	W2 • Fri Validation Retry Loop	SKILLJAR MODULE (no matching lesson)
	<i>No direct lesson — see notes.</i> The retry-loop pattern is canonical exam material that lives in practice, not video. Use the 30 minutes to re-read Building Effective Agents, specifically the evaluator-optimizer section — your retry loop is a minimal case of that pattern.	

D13

W2 • Sat

Prompt Caching

SKILLJAR MODULE

Features of Claude

- Prompt caching ~4m
- Rules of prompt caching ~7m
- Prompt caching in action ~7m

Rules of prompt caching is the highest-leverage lesson for the exam — memorize the 1024-token minimum, cache scope, and TTL.

D14

W2 • Sun

Week 2 Review

SKILLJAR MODULE

Prompt eval + Prompt engineering

- Quiz on prompt evaluation ~15m
- Quiz on prompt engineering techniques ~15m

Official Week 2 self-test. Both quizzes live in their respective modules' final lesson in the Skilljar sidebar (look for **Quiz on ...**). *Quiz on features of Claude* covers vision and caching — take it today if you feel solid, otherwise save for next Sunday.
